

Setting the Rake on the Shark

1. With someone holding the mast upright with the spin halyard, take off the forestay.
2. Bring the forestay to the mast and hold it against the mast.
3. Place a mark on the forestay in line with the TOP of the black band (A)
4. Re-attach the forestay to the stem plate.
5. Adjust the turnbuckles on the forestay such that the distance between the pin on the stem plate and the mark on the forestay (B) is 56 inches (56.5 if you are using the Haarstick sails).
